

CHP65 Surge Protection

The CHP65 is an ideal Weatherproof Termination Box to extend the cable length of hydrostatic probes. Its characteristic is protection against voltage surges generated by lightning strike, over voltage in the supply network and also protection for the vent tube for atmospheric compensation if the cable needs to be shortened.

Dimensions

Characteristics

- Nominal Voltage: **12...30 Vdc**
- Insulation Resistance: **>1G ohms**
- Max. Voltage before conduction: **(Spark-Over voltage) 90V +/- 20%**
- Max. Discharge current: **10K Amperes**
- Response time: **20ns**
- Electrical connection: **M16 cable gland**
- Body material: **Aluminum**
- Temperature: **-10...80°C**
- Class Protection: **IP67**
